Following business was transacted during the meeting.

Item No. 1: - Confirmation of the minutes of the last meeting.

Resolution No. 1: - Minutes of the meeting held on 28-05-2016 were read and unanimously confirmed.

Proposed by: - Prof. Mrs. V. D. Jadhav

Seconded by: - Mrs. P. B. Kadam.

Item No. 2: - Review of work done in respect of functions of IQAC.

Resolution No. 2: - It was brought to the notice of the meeting that functions of IQAC can be divided into three categories viz. Academic Task, Administrative Task and Financial Task.

I - Review of academic functions was taken in the meeting as follows;

- i) Academic calendar was put before the meeting.
- ii) Teaching plan of all the subjects was put before the meeting.
- iii) ISCs and chapter tests were conducted in the First semester of Academic Year 2016-17, as per Institute Policy.
- iv) Slow learners were identified and practice sessions were conducted.
- v) Expert/guest lectures were arranged in the departments.
- vi) GD and mootle sessions were conducted.
- vii) Four types of feed backs viz. feed back by Dean Academics in class, CR feed back, feedback in Students Council and Online feedback.

Appropriate action also taken based on feedback.

II-Review of administrative task was taken in the meeting as follows;

- i) Meetings of Local Managing Committee, Board of Governors, Students' Council, Standing Committee, Deans and HODs meeting, General Staff meeting, Grievance Redressal Committee, Women Grievance Redressal Committee, Academic Advisory Committee were conducted and minutes of these meetings were put before the meeting.
- ii) Youth Festival was successfully organized by our college on 5-7 October, 2016.
- iii) National Level Annual Technical Symposium - Olympiad 2K16 was successfully organized on 15-16 September, 2016 for students.
- iv) Functions like Teachers' Day, Engineers' Day, SVERI Foundation Day, Independence Day, Mahatma Gandhi Jayanti were celebrated.

III → Review of financial task was taken in the meeting which is as follows;

- i) Review of budget was taken regularly in Deans and HODs meetings. A special budget review meeting was also conducted by Dr. S.M. Mukane on 21-08-2016.
- ii) Circulars related to financial assistance to students and staff, were put before the meeting.

VI - The Annual Quality Assurance Report (AQAR) for Academic Year 2015-16 was put before the meeting,

Thorough discussion was made and it was unanimously resolved as follows,

- i) Minutes of above mentioned committees, Circulars, Office Orders were approved.
- ii) Overall responsibility chart in addition to academic load be prepared by each HOD.
- iii) Dean R&D will prepare IPR policy in respect of research improvement quality.
- iv) Sub committee under the coordinators of Dr. P. M. Patil will prepare plan for quality benchmark for next accreditation cycle. Members of the committee will be Dr. S. M. Mukane, Dr. Sridhar, Dileep, Prof. Mrs. R. R. Bhorale, Dr. A. A. Utpat and Prof. Mrs. M. M. Bhorale.
- v) There should be separate building for Library and R&D activities.
- vi) To approve Annual Quality Assurance Report (AQAR) for Academic Year 2015-16 and be sent to NAAC.

Proposed by: Prof. C. B. Madagouda
Seconded by: Dr. S. M. Mukane.

Item No. 5: - Issue with the permission of the Chair.
Resolution No. 3: -

There being no further issue to discuss, meeting concluded with vote of thanks to the chair and all present.

Resolution No. 2:- It was brought to the notice of the meeting that following Quality Assurance Activities are being carried out.

- i) Backlog sessions: Backlog sessions are being organized for the subjects where the results are not upto the mark. The names of subjects for backlog sessions are decided in the Deans & HODs meeting.
 - ii) Practice sessions: Practice sessions for difficult subjects are being arranged. These subjects are decided in the Deans & HODs meeting.
 - iii) Training: Various trainings are being arranged for the students to improve their soft skills & Technical skills and in turn to increase placement of students.
 - iv) HR Activities: Human Resource Development Trainings through Workshops, FDPs, STTPs, Seminars are being provided to teaching and non-teaching staff members.
 - v) Feedback sessions: Three different kinds of feedbacks are collected from the students and action is taken on the same. These feedbacks are as follows:
 - a) Feedback taken by Dean Academics once in a semester
 - b) Feedback taken by HOD from C.R. and two to three students of the class.
 - c) Suggestion box Opened Weekly.
 - vi) Result Analysis is being carried out every semester and accordingly result targets are set.
- Meeting unanimously took the note of the above and accorded its approval.

Item No. 3(ii) About Quality Culture in the Institute.

Resolution No 3(ii): It was brought to the notice of the meeting that we have been taking efforts on different fronts for building and maintaining Quality Culture in the Institute as per the details given below:

- a) Academic front:

Pandharpur Pattern in Professional Education (PPPE) and related circulars are the guiding documents for maintaining Quality Culture in

teaching learning process, students and staff development, co-curricular & extra curricular activity.

b) Admission front:

System Manual, HR Manual and related circulars are guiding documents in maintaining Quality Culture on admission front.

The above documents were put before the meeting. Meeting unanimously took the note of the above.

Introduction

The SVERI's College of Engineering is an academic institution for a higher level of knowledge generation and dissemination through teaching programs and effective research activities. The Institute offers graduation, post-graduation, and research programs to students from rural backgrounds from nearby villages to Pandharpur city. The students are admitted to the institute through the Central Admission Process (CAP) and Management Quota. The vital aim of the programs in the institute is to make all students admitted to the institute equipped and competent to face the challenges of life and contribute to societal development along with academic achievements. This is possible through the process of making the academics more needful and competent for the slow and advanced learners to achieve excellence in their academics and personal life.

Preamble

The policy for slow and advanced learners of the SVERI's College of Engineering, Pandharpur is made to make slow learners be better performers and advanced learners to be excellent achievers. The students have different learning attitudes and learning habits. Accordingly, the teaching-learning process has to be adapted so that the teachers do not lose the attention of the slow learners and turn off the advanced learners. This policy helps to improve the teaching learning approach and to decide action plans for the benefit of the slow and the advanced learners in the institute along with the students having moderate performance.

Objectives

The objectives of this policy are as follows:

- i) To identify the slow learners and advanced learners.
- ii) To provide remedial strategies for improving their academic performance and make them employable for building a successful career.
- iii) To boost up the confidence of slow learners and to minimize the barrier.
- iv) To develop significant strategies and scientific implementations for the benefit of advanced and slow learners through Outcome Based Education (OBE).
- v) To implement modern pedagogical methods and ICT-enabled teaching-learning processes to promote teaching-learning.
- vi) To encourage advanced learners to be excellent achievers through an innovative and creative mindset.
- vii) To conduct expert lectures for strengthening Industry Institute Interaction.
- viii) To conduct Advanced Technical Training for competitive examinations.

B. Range

Criteria

The Institute takes due care about not creating any psychological division and labeling them as particular types of learners. The teachers and mentors have close observation of students' learning styles and their academic performance for the identification of slow and advanced learners. It is also ensured that the slow learners are transferred to advanced learners' groups with improvement in their performance.

- Some of the learning styles including, field-dependent/independent, divergent/convergent thinking, risk-taking/cautionary, reflective/impulsive, extroverted/introverted, energetic/lethargic are observed during lectures, practicals, fieldwork, project work, Proctor Sessions, participation in co-curricular/extracurricular activities, etc.
- The types of learners are also identified on a time-to-time basis through academic results viz. S.S.C. H.S.C./MHT CET result, University result of each semester, Diploma results in case of Direct Second Year students, and In-Semester Examination result.

Action plan for slow learners

- i) Conduction of remedial classes for students having backlog subjects
- ii) Providing simplified and focused study material
- iii) Assignments for clearing their concepts on regular basis
- iv) Conduction of proctor session for counseling students to address their common or peculiar issues and to boost their confidence
- v) Provision of three hours in the evening for self-study in the study hall facility
- vi) University answer scripts of toppers are kept in the library for the ready reference of model answers

Action plan for advanced learners

- i) Conduction of Advanced Technical Training (ATT) for competitive examinations
- ii) Guidance sessions for research orientation and competitive examinations
- iii) Motivation for extra and co-curricular activities
- iv) Assignment questions as per the level of difficulty for maintaining consistency in high academic results
- v) Involving students in Research
- vi) Product Development and Consultancy activities
- vii) Free book bank facility for toppers
- viii) Felicitation in front of stakeholders
- ix) Best Outgoing Student and Best Project Awards
- x) Merit cash prizes and Medals for encouragement
- xi) Media coverage of such students' achievements and sharing with their parents through social media

B. Pange

Common strategies for all students

- Conduction of practice sessions for difficult subjects
- Organizing motivational speeches of renowned personalities from scientific and societal background.
- Conduction of soft skill training programs
- Encouraging students to take up competitive exams like GATE, GRE, MPSC, UPSC, etc.
- Counselling of students by Counsellor for focusing on study, time management, concentration, peculiar issue, etc.
- Conduction of Pranayama for stress management

Expected Outcomes

- Enhancement in involvement in the classroom teaching-learning process of slow learners.
- Improvements in university examination results of identified slow learners
- Development of better and accurate sense of self with improved confidence
- Maintaining consistency in high academic performance by the advanced learners
- Enhancement in subject knowledge, research publications, quality projects, and participation and performance in competitive examinations of advanced learners
- Augmentation in soft skills to face the placement drives successfully
- Development and nurturing a deep understanding of personal motivation

Dear all

All staff members are informed to note the following points while performing Night study duty.

1. As per the discussion in the Principal, Deans and HoDs meeting scheduled on 29/03/2023. It has been decided that all the faculty members who are reporting to Night study duty should do punching for incoming as well as outgoing. (Biometric Machine is fixed at PRO office main porch, College of Engineering, Pandharpur for male faculty members. For female faculty members Biometric Machine is fixed at main porch, College of Pharmacy, Pandharpur). all the faculty members are hereby informed to do the punching for the incoming on or before 8:30 P.M. and outgoing on or after 11:00 P.M.
2. Faculty night study attendance file and students night study attendance file is kept at HoD cabin in Mechanical Engineering Department for boys and for girls it is with Earn and Learn student of respective class assigned by Night study coordinator. (Night Study File)
3. Faculty members are requested to mark your attendance in the Faculty Attendance record file with proper signature and time. (Incoming & outgoing time.)

4. Faculty members who have assigned Supervisor duty should ensure that all students are sitting at their allotted Classrooms/ locations only.
5. Faculty members are informed that use of Mobile phones, Headphones or any other electronic gadgets during Night study sessions is strictly prohibited.
6. Faculty members are informed take frequent rounds and maintain discipline during the entire Night study session.
7. Faculty members are requested to make sure that students are not using Mobile phones, Headphones or any other electronic gadgets during Night study sessions. Use of Laptop is permitted if a student has taken permission from the respective Head of department and Dean Students with proper application.
8. Take attendance at the end and fill it in the Attendance sheet provided in the Night study file.
9. Also submit an Absentee Report to the Night study coordinator in a given format. (Separate report for S.Y.B.Tech. and T.Y.B.Tech. should be submitted)
10. Faculty members are requested to submit a required form to add Compensatory off (CO) on your name with the signature of Night study coordinator, HoD and Dean students on a timely basis.

10. For any query kindly contact

Professional Counseling

- 1. Certificate / Add On course**
- 2. Workshop / Seminar**

Contents of Workshop:

Day 1:

Latch, Interlock, Flag, Basic Program, and Practice of programs in CODESYS software.

Day 2:

PLC Block Diagram, Type of PLC, Micro PLC and Modular PLC, Introduction to LADDER diagram language
Basic instructions for LADDER diagram (NO, NC, COIL), LADDER diagram for digital gate, Truth table trick for LADDER diagram programming.

Day 3:

Basic programs in the LADDER diagram
Introduction to CODESYS software, Simulation and visualization.

Day 4

Latch, Interlock, Flag, Basic Program
Practice of programs in CODESYS software.

Day 5

Latch, Interlock, Flag, Basic Program
Practice of programs in CODESYS software.

Day 6

Basic programs based on the Timer, and Practice on programs in CODESYS software., Visualization and simulation in CODESYS software.

Visualization and simulation in CODESYS software.

Day 7

Counter instruction, type of counters, counter-based program
Introduction to MITSUBISHI PLC, and introduction to GX software

Day 8

PLC Wiring, Project development, PLC communication, PLC download and upload, Online editing, and Troubleshooting.

Day 9

HMI, HMI screen development, HMI PLC communication, Project Development,
Introduction to SCADA, SCADA screen development, HMI PLC communication, and Project Development.

Day 10

VFD, Parameter Setting, Interface with PLC, Project Development
Introduction to an analogue system, ADC, DAC, Interface with PLC, and Project Development.

• About The College

Pandharpur is well well-known holy place where Lord Shri Vithal Temple is located on the bank of the river Chandrabhaga. It is recognized as the spiritual capital of Maharashtra and popularly known as “South Kashi” of India. Shri Vithal Education and Research Institute (SVERI), a charitable trust formed by devoted technocrats, established its first Project, the SVERI’s College of Engineering, Pandharpur in 1998, which is approved by AICTE, New Delhi. It has been affiliated to PAH Solapur University, Solapur. The Engineering College is ISO 9001:2015 certified institute NAAC A+.

About The Department

The department was established in the year 1998 and offers UG in E&TC , PG and Ph.D.in E&TC Engineering. The department is backed with well qualified staff and state of art laboratory facilities. The department has established Center of Excellence in Antenna design and testing as well as Machine Learning through MODROB. The department has nurtured the research environment through various funded projects (1.75 Cr. till date) by various funding agencies like DST, AICTE, RGSTC, BRNS, etc. The Department has got NBA and NAAC accreditation twice.

• About The Workshop:

Specifically, PLCs control some of the most complex processes within industrial plants. They are often deployed to monitor running machines and motors. In order to provide more functionality, a PLC is easy to program. Moreover, these devices are scalable. SCADA stands for Supervisory Control and Data Acquisition. SCADA is a monitoring software used in these industries. As software, it helps control the hardware and makes a record of the data collected from all remote locations. SCADA software is connected to computers, graphical user interfaces, sensors and networked data communications in order to provide a broad picture of the process.

St. Joseph Engineering College campus, Vamanjoor, Mangaluru, Karnataka 575028

Respected Sir,

We express our heartfelt gratitude towards you for visiting SVERI'S COE, Pandharpur and as a Resource Person For 10 Days workshop on "Advanced Industrial Automation and Control" for final year ENTC students.

Sir, your guidance and skill shared with students during these 10 days, motivated and encouraged our students and staff members. Your valuable thoughts will always keep us inspired and motivated. We request the same kind of Co-operation and Guidance in future also.

Thanking you.

Yours Faithfully,

(Dr. Mrs. M. M. Pawar)

Subject: Invitation as a Resource Person for 5 Days workshop on "Advanced Industrial Automation and Control"

Respected Sir,

Shri Vithal Education and Research Institute (SVERI), a charitable trust founded by a group of experienced technocrats, started SVERI'S College of Engineering Pandharpur in 1998, as its first venture with the approval from AICTE, New Delhi. It has been affiliated with Punyashlok Ahilyadevi Holkar Solapur University, Solapur. Recently, the College received an A+ grade with CGPA 3.46 NAAC Accreditation. The College has a UG, PG and PhD program. The college is ISO 9001:2015 certified and has also been accredited by IE (I), Kolkata and TCS, Pune.

Inviting you as the Resource Person for a 10-day workshop on "Advanced Industrial Automation and Control" for final-year ENTC students is immensely pleasing. The workshop will be conducted in the period of 25th September 2023 to 05th October 2023. We are sure that your guiding words will add energy to our endeavours for the development process of our institute.

Sir, we are very much eager to welcome you as a resource person.

Thanking You,

Yours Faithfully,

(Dr. Mrs. M. M. Pawar)

Brief Details about the Workshop:

The Department of Electronics and Telecommunication Engineering, SVERIs College of Engineering, Pandharpur organized a 10-day Workshop on "Advanced Industrial Automation Control " from 25th September 2023 to 5th October 2023 (10 Days). The course started with an inaugurating function which was held on 25th September, 2023.

On the first day, Sir explained about hierarchy of the Industrial Automation Industry, Introduction to Field Devices, Introduction to controllers, PLC vs. microcontroller, Basics of electrical diagrams.

On the second day, sir explains about PLC Block Diagram, Type of PLC, Micro PLC and Modular PLC, Introduction to LADDER diagram language, Basic instructions for LADDER diagram (NO, NC, COIL), LADDER diagram for digital gate, Truth table trick for LADDER diagram programming.

On the third day, sir explained about Basic programs in the LADDER diagram, Introduction to CODESYS software, Simulation and visualization.

On the fourth Day, Sir Explained about Latch, Interlock, Flag, Basic Program, and Practice of programs in CODESYS software.

On the fifth day, sir explained Timer instructions, the type of timer, introduction to on delay timer, Basic programs based on the Timer, and Practice on programs in CODESYS software.

On the sixth Day, sir Explained Basic programs based on the Timer, and Practised on programs in CODESYS software., Visualization and simulation in CODESYS software.

On the Seventh Day, Sir elaborated on counter instruction, type of counters, counter-based program, Introduction to MITSUBISHI PLC, and introduction to GX software.

On the eighth day, Sir explained about PLC Wiring, Project development, PLC communication, PLC download and upload, Online editing, and Troubleshooting.

On the ninth day, Sir gives an introduction to HMI, HMI screen development, HMI PLC communication, Project Development, Introduction to SCADA, SCADA screen development, HMI PLC communication, and Project Development.

On the tenth day, Sir explained VFD, Parameter Setting, Interface with PLC, Project Development, Introduction to an analogue system, ADC, DAC, Interface with PLC, and Project Development.

The certification course concluded with a Quiz test valedictory function and certificate distribution.

a).

$$\rightarrow (D^3 - 2D^2 - 5D + 6)y = e^{4x}.$$

be given linear diff. eqⁿ.It's auxiliary eqⁿ is,

$$\therefore D^3 - 2D^2 - 5D + 6 = 0$$

$$D = 3, -2, 1$$

It's c.f. is,

$$\therefore c.f. = C_1 e^{3x} + C_2 e^{-2x} + C_3 e^{1x}.$$

It's P.I. is,

$$P.I. = \frac{1}{(4)^3 - 2(4)^2 - 5(4) + 6} e^{4x}$$

$$P.I. = \frac{1}{18} e^{4x}.$$

It's solution is,

$$\therefore y = c.f. + P.I.$$

$$\therefore y = C_1 e^{3x} + C_2 e^{-2x} + C_3 e^{1x} + \frac{1}{18} e^{4x}.$$

UNIT 2: E-R MODEL

Syllabus: Overview of design process, E-R Model, Constraints, E-R Diagrams, E-R Design Issues, Weak Entity Sets, Extended E-R Features, Reduction to Relational Schema.

Book: Database System Concepts by Abraham Silberschat, Henry F. Korth, S. Sudarshan (McGraw Hill International Edition) Sixth Edition.

Title of the Chapter:

- ER model stands for an Entity-Relationship model.
- **Entity:** An entity may be any object, class, person or place.
- **Relationship:** A relationship is used to describe the relation between entities.
- **E-R Model:** The Entity Relational Model is a model for identifying entities to be represented in the database and representation of how those entities are related.

Central Idea of the Chapter:

- Chapter 2 emphasis on database design using the entity-relationship data model.
- The entity-relationship data model provides a high-level view of the issues in database design and of the problems that we encounter in capturing the semantics of realistic applications within the constraints of a data model.

Importance of the Chapter:

1. To understand the foundations of the data/information that is going to be stored within their database.
2. It gives a standard solution for visualizing the data logically.

Chapter Outcomes:

- At the end of the chapter student will be able to design schema using E-R model and develop relational model.

* Overview Of Design Process:

- > Database design process is a series of steps used to properly design a database system.
- > It is used to map the conceptual model to implementation model.
- > Database development team (DBA, developers and programmers) use these steps to design and implement a database system.
- > The information in database must be up to date and complete and must be available to users very easily and quickly.
- > Properly designed databases are easy to maintain, improves data consistency.
- > The database design process can be divided into various steps:

fig-1: Database Design Process

i) Planning: - The planning starts when a customer request to develop the database system.

- It consists of various activities which identify the resources needed to develop the system.

- It also identifies the time limits for the completion of the system.

ii) Requirement Analysis: - Requirement analysis is done in order to understand the problem, which is to be solved.

- The person responsible for the requirement analysis is often called "Analyst".

- During analysis, areas for improvement are pointed out.

- It also includes the detail study of operations performed in the system.

iii) Design: - Database design or development of conceptual data model is the main body of database development process.

- It is further divided into two phases:

a) Logical Database Design:

- It is a conceptual data model.

- It is used to define data definitions, database attributes, entities and their relationships, unique identifiers.

- It describes the structure and type of data that will be used in database.

- Database security and data integrity are also defined at this stage.

b) Physical Database Design:

- Physical database design is the last stage of database design.

- The objective of physical database design is to implement the database as a set of stored records, files, indexes and other data structures.

- These data structures provide performance and also ensure data integrity, security and recoverability.

iv) Implementation: - After the design and development database system is implemented.

- Database system developed and installed for users.

- Implementation may have certain hardware requirements.

- It may require network hardware if the database is to be accessed from multiple locations.

* E-R Model:

- E-R model in DBMS is the high level data model.
- It stands for the Entity-Relationship Model.
- It is used to represent a logical view of the system from a data perspective.
- It develops a conceptual design for a database that provides a very simple and straightforward view of the data.
- E-R model makes use of ER diagrams, which are the diagrams sketched to design a database.
- E-R diagrams are built on three basic concepts:
 - A) Entities
 - B) Attributes
 - C) Relationships
- An E-R diagram in DBMS defines entities, associations, attributes, and relationships between entities.
- This helps visualize the logical structure of the database.
- The E-R diagram was proposed by Peter Chen in 1976.

Components of E-R Diagram:

- The E-R diagram consists of three basic concepts:
 - A) Entity
 - B) Attributes
 - C) Relationships

Fig 2: Components Of R-R Diagram

A) Entity:

- An entity is a "thing" or "object" in the real world.
- Each entity consists of several characteristics or attributes that describe that entity.
- For example, if a person is an entity, its attributes or characteristics are age, name, height, weight, occupation, address, and so on.
- An entity set is a set of entities of the same type that share the same properties or attributes.
- For example, a car entity set, an animal entity set, a bank account entity set, and so on.
- Entities are of two types:
 1. Strong Entity:
 - A strong entity is an entity type that has a key attribute.
 - It doesn't depend on other entities in the schema.
 - A strong entity always has a primary key.

- Example: - Roll-Number identifies each student of the organization uniquely and hence, we can say that the student is a strong entity type.

11. Weak Entity:

- Weak entity type doesn't have a key attribute and so we cannot uniquely identify them by their attributes alone.

- Therefore, a foreign key must be used in combination with its attributes to create a primary key.

- For example, the address can't be used to uniquely identify students as there can be many students from the same locality.

B) Attributes:

- An attribute is a property or characteristic of an entity.

- An entity may contain any number of attributes.

- Example: Name, Age, mobile no. are the attributes that define the entity type student.

- There are four types of attributes:

1. Simple Attributes:

- Simple attributes are those that cannot be further divided into sub-attributes.

- Example: A student's roll number or the employee identification number.

II. Composite Attributes:

- An attribute that is composed of many other attributes and can be decomposed into simple attributes. is known as composite attribute.

- Example: A student's address can be divided into city, state, country and pincode.

III. Multivalued Attributes:

- Multivalued attributes are attributes that can have more than one value.

- Example: Mobile number of a student is a multivalued attribute as one student can have more than one mobile number.

IV. Derived Attributes:

- Derived attributes are the ones that can be derived from other attributes of an entity type.

- Example: The age attribute can be derived from the date-of-birth (DOB) attribute.

c) Relationships:

- Any association between two entities is known as a relationship between two entities.

- Example: The driver drives a car.

- In the above example, the driver and the car are entities whereas the word drives is a relationship between two entities.

- Moreover, the attributes of the driver entity

can be that it is a person and the car entity can be that it is a vehicle.

- There are four types of relationships:

i. One-to-One Relationship:

- A one-to-one relationship occurs when each record in one entity is related to only one record in another entity and vice versa.

- Example: If there are two entities, one is a 'Person' (Id, Name, Age, Address) and the other is a 'Passport' (Passport-id, Passport-no) then each individual can only have one passport and each passport can only belong to one person.

ii. One-to-Many Relationship:

- In this relationship, a record in one entity can be associated with multiple records in another entity, while each record in the second entity is related to only one record in the first entity.

- Example: If there are two entity types 'customer' and 'Account' then each 'customer' can have more than one 'Account' but each 'Account' is owned by only one 'customer'.

iii. Many-to-One Relationship:

- When more than one records of an entity is associated with a single record of another entity then it is called many-to-one relationship.

- Example: Many students can study in a single college but a student cannot study in many colleges at the same time.

IV. Many-to-Many Relationship:

- When more than one records of an entity is associated with more than one instances of another entity then it is called many-to-many relationship.

- Example: A 'student' can be assigned to many 'Project' and a 'Project' can be assigned to many 'students'.

* Constraints:

→ constraints are used for modeling limitations on the relations between entities.

→ There are two types of constraints on the Entity Relationship (E-R) model:

- A) Mapping cardinality or cardinality ratio
- B) Participation constraints.

A) Mapping Cardinality:

- It is expressed as the number of entities to which another entity can be associated via a relationship set.

- For a binary relationship set R between entity sets A and B , the mapping cardinality must be one of the following:

i) One-to-One:

• An entity set A is associated with at most one entity in B and an entity in B is associated with at most one entity in A .

ii) One-to-Many:

• An entity set A is associated with any number of entities in B with a possibility of zero and an entity in B is associated with at most one entity in A .

iii) Many-to-One:

• An entity set A is associated with at most one entity in B and an entity set in B can be associated with any number of entities in A with a possibility of zero.

iv) Many-to-Many:

• An entity set A is associated with any number of entities in B with a possibility of zero and an entity in B is associated with any number of entities in A with a possibility of zero.

B) Participation Constraints:

- Participation constraints tell us that the participation in a relationship can be either total or partial.

- Participation constraints are two types as mentioned below:

i) Total Participation

ii) Partial Participation

i) Total Participation:

• The participation of an entity set A in a relationship set R is said to be total if every entity in A participates in at least one relationship in R.

- Example: It specifies that each student must be enrolled in at least one course where the "student" is the entity set and relationship "enrolled in" signifies total participation. It means that every student must have enrolled at least in one course.

ii) Partial Participation:

- It specifies that each entity in the entity set may or may not participate in the relationship instance of the relationship set, is also called as optional participation.

- Example: There might be some courses where enrollments are not made i.e. enrollments are optional in that case.

* E-R Diagrams:

→ An E-R diagram can express the overall logical structure of a database graphically.

→ E-R diagrams are simple and clear.

Basic Structure:

- An E-R diagram consists of the following major components:

Symbol	Name	Description
	Entity - strong	Simple Rectangular Box
	Entity - Weak	Double Rectangular Boxes
	Relationships	Diamond shaped Box
	Attribute - Simple	Ellipses
	Attribute - Composite	Ellipses are connected with an ellipse.
	Attribute - Multivalued	Double Oval
	Attribute - Derived	Dashed Ellipse
	Attribute - Simple	Oval with underlying lines
	Line	Link entity sets to relationship sets

	One-to-one Relationship	When only instance of an entity associated with the relationship, it is marked as 1:1.
	One-to-Many Relationship	When more than one instance of an entity associated with a relationship, it is marked as 1:M.
	Many-to-One Relationship	When more than one instance of an entity associated with a relationship, it is marked as M:1.
	Many-to-Many Relationship	
	Total Participation	Double line
	Partial Participation	Single line
	Weak Relationship	Double Diamond

* E-R Diagram For The University Enterprise:

Fig 3: E-R Diagram for a University Enterprise

→ The university is organized into departments.

→ Each department is identified by a unique name (dept-name) and is located in a particular building and has a budget.

→ Each department has a list of courses it offers.

→ Each course has associated with it a course_id, title and credits, and may also have associated prerequisites.

- > Instructors are identified by their unique ID.
- > Instructors also work as advisors to the students.
- > Each instructor has name and salary.
- > students are identified by their unique ID.
- > Each student has a name and tot-cred (total credit hours the student earned).
- > The university maintains a list of classrooms, specifying the name of the building, room number and room capacity.
- > The university maintains a list of all sections taught.
- > Each section is identified by a sec-id, semester and year. and has associated with sec-class, is identified by building, room number and capacity and also associated with time slot.

Entity Sets:

- department: with attributes (dept-name, building, budget)
- course: with attributes (course-id, title, credits)
- instructors: with attributes (ID, name, salary)
- student: with attributes (ID, name, tot-cred)
- classroom: with attributes (building, room-number, capacity)
- section: with attributes (sec-id, semester, year)
- time-slot: with attributes (time-slot-id, { (day, start-time, end-time) })

Relationship sets:

- inst-dept: relating instructors with departments
- stud-dept: relating students with departments
- teaches: relating instructors with sections
- takes: relating students with sections
- course-dept: relating courses with departments
- sec-course: relating sections with courses
- sec-class: relating sections with classrooms
- sec-time-slot: relating sections with time slots.
- advisor: relating students with instructors
- prereq: relating courses with prerequisite courses

* E-R Design Issues:

- > The relationship among various entities can be represented in many ways.
- > When we say "Design Issue" we mean the basic issues that may arise while designing an E-R database schema and proper approach to solve them.
- > The basic issues and relative solutions concerning them are:
 - A) Use of Entity sets Versus Attributes
 - B) Use of Entity sets Versus Relationship sets
 - C) Binary Versus n-ary Relationship sets
 - D) Placement of Relationship Attributes

A) Use of Entity sets Versus Attributes:

- In this case we treat an attribute as an entity.

- For Example:

• Consider the entity set instructor with attributes ID, name, salary and phone-number.

instructor
ID
name
salary
phone-number

• It can easily be argued that a phone is an entity in its own right with attributes phone-number and location.

• The location may be the office or home where the phone is located.

• If we take this point of view, we do not add the attribute phone-number to the instructor.

• Rather we create:

- A phone entity set with attributes phone-number and location.

- A relationship set inst-phone denoting the association between instructor and the phone that they have.

B) Use Of Entity Sets Versus Relationship Sets

- At several instances, it is not always clear whether an object can be best expressed by an entity set or a relationship set.

- In figure, we used the 'takes' relationship set to model the situation where a student takes a section of a course.

- An alternative is to imagine that there is a course-registration record for each course that each student takes.

- Then we have an entity set to represent the course-registration record.

- Let us call that entity set "registration".

- Each registration entity is related to exactly one student and to exactly one section, so we have two relationship sets, one to relate course registration records to students and one to relate course-registration records to sections.

- In the figure below we show the entity sets 'section' and 'student'.

- Note that we use double lines to indicate total participation by "registration" entities.

Binary Versus n-ary Relationship Sets

- Relationships in databases are often binary.

- Some relationships that appear to be non-binary could actually be better represented by several binary relationships.

- For instance, one could create a ternary relationship 'parent', relating a child to his/her mother and father

- However, such a relationship could also be represented by two binary relationships, mother and father, relating a child to his/her mother and father separately.

- Using the two relationships mother and father provides us a record of a child's mother even if we are not aware of the father's identity.

- A null value would be required if the ternary relationship parent is used.

- In fact, it is always possible to replace a nonbinary (n -ary, for $n > 2$) relationship set by a number of distinct binary relationship sets.

- For simplicity, consider the abstract ternary ($n=3$) relationship set R , relating entity sets A , B and C .

- We replace the relationship set R by an entity set E , and create three relationship sets:

- R_A relating E and A
- R_B relating E and B
- R_C relating E and C

- If the relationship set R had any attributes, these are assigned to entity set E .

D) Placement Of Relationship Attributes:

- The cardinality ratio of a relationship can affect the placement of relationship attributes.

- Thus, attributes of one-to-one or one-to-many relationship sets can be associated with one of the participating entity sets, rather than with the relationship set.

- For instance, let us specify that advisor is a one-to-many relationship set such that one instructor may advise several students, but each student can be advised by only a single instructor.

- In this case, the attribute date, which specifies when the instructor became the advisor of a student, could be associated with student entity.

- Attributes of one-to-many relationship sets can be repositioned to only the entity set on the "many" side of the relationship.

- For one-to-one relationship sets, the relationship attributes can be associated with either one of the participating entities.

- For many-to-many relationship set, attributes must be associated with relationship sets rather than one of the participating entities.

* Weak Entity Sets:

→ A weak entity set is an entity set that does not contain sufficient attributes to uniquely identify its entities.

→ In other words, a primary key does not exist for a weak entity set.

→ However, it contains a partial key called as a discriminator

→ Discriminator is represented by underlining with a dashed line.

→ The combination of discriminator and primary key of the strong entity set makes it possible to uniquely identify all entities of the weak entity set.

→ It is also known as identifying or owner entity set.

Primary key of weak entity set = Its own discriminator + Primary key of strong entity set

→ A double rectangle is used for representing a weak entity set.

→ A double diamond symbol is used for representing the relationship that exists between the strong and weak entity sets and this relationship is known as identifying relationship.

→ A double line is used for representing total participation

* Extended E-R Features:

→ As the complexity of data increased, it became more and more difficult to use the traditional E-R model for database modelling.

→ Hence, some improvements or enhancements were made to the existing E-R model to make it able to handle the complex applications better.

→ Following are the new concepts added to the existing E-R Model:

- I. Generalization
- II. Specialization
- III. Attribute Inheritance
- IV. Aggregation
- V. Constraints on Generalization

1) Generalization:

- Generalization is the process of extracting common properties from a set of entities and create a generalized entity from it.

- Generalization is a "bottom-up approach" in which two or more entities can be combined to form a higher level entity if they have some attributes in common.

- That is, subclasses are combined to make a superclass.

- Consider we have three sub entities: Car, Bus and Motorcycle and these three entities can be generalized into one higher-level entity (or superclass) named as Vehicle.

11) Specialization:

- Specialization is opposite of Generalization.
- In specialization, an entity is broken down into sub-entities based on their characteristics.
- Specialization is a "Top-down approach" where higher level entity is specialized into two or more lower level entities.
- Specialization is used to identify the subset of an entity set that shares some distinguishing characteristics.
- It is depicted by triangle component labeled as ISA.
- For example: Vehicle entity can be a Car, Bus or Motorcycle.
- Normally, the superclass is defined first, the subclass and its related attributes are defined next and relationship set are then added.

iii) Attribute Inheritance:

- Inheritance is an important feature of generalization and specialization.

- Attribute inheritance allows lower level entities to inherit the attributes of higher level entities.

- For example, consider relations. Car and Bus inheriting the attributes of Vehicle.

- This also extends to Participation inheritance in which relationships involving higher-level entity sets are also inherited by lower-level entity sets.

iv) Aggregation:

- Aggregation is used when we need to express a relationship among relationships.
- Aggregation is an abstraction through which relationships are treated as higher level entities.
- Aggregation is a process when a relationship between two entities is considered as a single entity and again this single entity has a relationship with another entity.
- For example: We consider a relationship set proj-guide (relating the entity sets instructor, student, and project) as a higher level entity set called proj-guide. We can then create a binary relationship eval-for between proj-guide and evaluation to represent which (student, project, instructor) combination an evaluation is for.

✓ Constraints On Generalization:

- To model an enterprise more accurately, the database designer may choose to place certain constraints on a particular generalization.

a) One type of constraint involves determining which entities can be members of a given lower level entity set and such membership may be one of the following:

- Condition-defined:

- In condition-defined lower level entity sets, membership is evaluated on the basis of whether or not an entity satisfies an explicit condition or predicate.

- For example, assume that the higher-level entity set student has the attribute student-type. All students entities are evaluated on the defining student-type attribute. Only those entities that satisfy the condition student-type = "graduate" are allowed to belong to the lower-level entity set graduate-student. All entities that satisfy the condition student-type = "undergraduate" are included in the undergraduate-student.

- User-defined:

- User-defined lower-level entity sets are not constrained by a membership condition, rather, the database users assign entities to a given entity set.

↳ A second type of constraint relates to whether or not entities may belong to more than one lower-level entity set within a single generalization.

- Disjoint:

- A disjointness constraint requires that an entity belong to no more than one lower-level entity set.

- Example: student entity can satisfy only one condition for the student-type attribute; an entity can be either a graduate student or an undergraduate student, but cannot be both.

- Overlapping:

- In overlapping generalizations, the same entity may belong to more than one lower-level entity set within a single generalization.

- Example: We assume a person may be both an employee and student

fig. Disjoint

fig. Overlapping

↳ A final constraint, the completeness constraint on a generalization or specialization, specifies whether or not an entity in the higher-level entity set must belong to at least one of the lower-level entity sets within the generalization/specialization.

- Total Generalization or Specialization:
 - Each higher-level entity must belong to a lower-level entity set.
- Partial Generalization or Specialization:
 - Some higher-level entity may not belong to any lower-level entity set.

Psychological Counselor
(Here afterwards called as the Counselor) | } Party No. 2 |

An Agreement is made on today i.e. Friday, 01/01/2021 between the SVERI and the Counselor on the following conditions:

1. That, the Counselor should render her services in the SVERI campus.
2. That, the Counselor shall be available in the SVERI campus once in a week i.e. on Monday for three hours from 11.00 A.M. to 2.00 P.M. However, if Monday is holiday or Counselor is not able to attend on some Monday, other day in that week can be decided for visit during that week in consultation with Registrar. The visits shall continue during teaching period of the semester. After teaching period gets over, visits may be continued, if required, as per the instruction from Institute side.
3. Counseling be made mainly for students, however, it shall be extended to staff also as per the requirement.
4. That, the SVERI shall provide the necessary Consulting Room with the required furniture, etc. in the campus.
5. That the SVERI shall pay an honorarium of Rs. 2,500/- (Rs. Two Thousand Five Hundred only) inclusive of all taxes per visit for three hours to the Counselor.
6. Counselor shall maintain the record of students branch wise and class wise and shall submit the same to Registrar at the end of every semester. However, record confidentially be maintained.
7. The agreement can be terminated by either party by giving one month's prior notice.
8. The above agreement shall automatically get terminated on 30/11/2021. However, the same can be further renewed with mutual consent.

The above agreement, with all its contents, is accepted by both parties and the agreement comes into the force from 01st January, 2021.

Flip-Flops

Different Types of Flip Flops

COMBINATIONAL CIRCUITS	SEQUENTIAL CIRCUITS
Output depends only on the present value of the inputs.	Output depends on both the present and previous state values of the inputs.
These circuits will not have any memory as their outputs change with the change in the input value.	Sequential circuits have some sort of memory as their output changes according to the previous and present values.
There are no feedbacks involved.	In a sequential circuit the outputs are connected to it as a feedback path.
Used in basic Boolean operations.	Used in the designing of memory devices.
Implemented in: Half adder circuit, full adder circuit, multiplexers, demultiplexers, decoders and encoders.	Implemented in: RAM, Registers, counters and other state retaining machines.

4-bit Johnson Ring Counter

Registers

FSM

Mealy Machine	Moore Machine
Output depends both upon the present state and the present input.	Output depends only upon the present state.
Generally, it has fewer states than Moore Machine.	Generally, it has more states than Mealy Machine.
The value of the output function is a function of the transitions and the changes, when the input logic on the present state is done.	The value of the output function is a function of the current state and the changes at the clock edges, whenever state changes occur.
Mealy machines react faster to inputs. They generally react in the same clock cycle.	In Moore machines, more logic is required to decode the outputs resulting in more circuit delays. They generally react one clock cycle later.

Counters

Synchronous/ Parallel Counter

Sr. No.	Parameter	Asynchronous counter	Synchronous counter
1.	Circuit complexity	Logic circuit is simple.	With increase in number of states, the logic circuit becomes complicated.
2.	Connection pattern	Output of the preceding FF is connected to clock of the next FF.	There is no connection between output of preceding FF and CLK of next one.
3.	Clock input	All the FFs are not clocked simultaneously.	All FFs receive clock signal simultaneously.
4.	Propagation delay	$P.D. = n * (td)$ where n is number of FF and td is p.d. per FF.	$P.D. = n * (td)FF + (td)gate$. It is much shorter than that of asynchronous counter.
5.	Maximum frequency of operation	Low because of the long propagation delay.	High due to shorter propagation delay.

Circular for Merit Prizes

Circular

All the Students & Staff members of our Institute are hereby informed to note the following important points for the selection of toppers for the award of merit prizes with effective from Academic Year 2016-17:

1. Aggregate percentage of marks in the previous Academic Year University Examination will be considered for deciding ranks in the class.
2. If as per 1) above, two or more students get equal top aggregate percentage then that many students be considered for merit prizes subject to maximum six students for 120 intake & three students for 60 intake.
3. For last eligible rank if more than one student become eligible then award be equally distributed amongst them.
4. For deciding toppers, eligible for merit prizes at SE level, basic branch of that student(s) in FE is to be considered.

All are requested to take note of the same and act accordingly.

Circular

All the Students and Staff of SVERI's College of Engineering, Pandharpur are hereby informed to note that, as per the resolution made in the BoG meeting dated 25/03/2018, MBA Students will get merit Prizes from the academic year 2016-2017 as per the following details;

- 1) Maximum up to 03 Students taking admission to MBA program will be given a cash prize of Rs.10,000 each, if they are in first ten ranks of the University in their graduation.
- 2) Maximum up to 03 students, securing more than 70% marks in aggregate for MBA-I examination be given a cash prize of Rs.10,000/-each.
- 3) Maximum up to 03 Students passing MBA will be given a cash prize, if they are University rankers as per following guidelines.
 - i) If student secures Rank 1 in the University, he/she will get a cash prize of Rs.15,000/-.
 - ii) If student secures Rank 2 in the University, he/she will get a cash prize of Rs.12,000/-.
 - iii) If Student secures Rank 3 in the University, he/she will get a cash prize of Rs.10,000/-.

The earlier circular bearing no. COEPR/2015-16/Circular/139(A) dated 18/01/2016 in this respect is stand cancelled herewith.

Circular for Merit Prizes

CIRCULAR

As per the resolution of Board of Governors in its meeting dated 17/12/2017, Gold Medal will be awarded to the student studying in TE classes as per following details:

1. Gold Medal and Certificate will be awarded to the student from our College who will stand first in SE University Examination amongst all departments every year. In case of Tie, medal will be given to the person having more marks in semester – I of SE. However, certificate will be given to all the concerned.
2. The award is with the title "Late Prabhakar Mengar Gold Medal".

This policy will come into force from the Academic Year 2017-18.

All the concerned should note the above and act accordingly.

Report on How to Write Research Paper

Title of Session: "How to Write Research Paper"

Date: 7th November 2023 and 7th December 2023

Venue: ENTC Department

Organizing Institute: SVERI's College of Engineering, Pandharpur

Resource Person: Dr. Neeta P. Kulkarni

Participants: Final Year ENTC Students

Brief Details about the Session:

The department of Electronics and Telecommunication Engineering, SVERI's College of Engineering, Pandharpur had organised a Session on "How to Write Research Paper" on 7th November 2023 and 7th December 2023 for Final Year Students. The aim of this Session is to expose the student to produce good quality research papers. She started with the basic idea of working with Research and Innovative minds. She gave an introduction of the research and went on with explaining about each and every concept mandatory for writing a research paper. Dr Neeta included the facts related to literature survey, method sectioning and proceeded with incorporating the importance of pictorial representation in a research paper. She asked students to focus on writing abstract results and conclusions with utmost care. She explained how proper writing of references and citations are important to the quality paper. She explained each aspect of 'before', 'during' and 'after' writing the research paper. Later on, she briefed about various templates for writing research papers (IEEE conference template in detail). Finally, she motivated students for quality research and stressed on productive teamwork to have good results. Students found this workshop interesting and knowledgeable. Students got to know a lot about how to start their journey on writing their first research paper. They also got to know the idea about publishing, patenting and copyrighting.

Report on How to Write a Report in LaTeX

Title of Session: "How to Write a Report in LaTeX"

Date: 4th November 2023 and 6th November 2023

Venue: Classroom No. MF417 ENTIC Department

Organizing Institute: SVERI's College of Engineering, Pandharpur

Resource Person: Mr. Pankaj. K. Choudhary & Ms. Mohua Biswas

Participants: Final Year ENTIC Students

Brief Details about the Session:

The department of Electronics and Telecommunication Engineering, SVERI's College of Engineering, Pandharpur had organised a Session on "How to Write a Report in LaTeX" on 4th November 2023 and 6th November 2023 for Final Year Students. The aim of this Session is to expose the student about the emerging technologies in the areas of Documentary Designing System using LATEX. The sessions will comprise theory and hands-on lab sessions. LATEX is an extremely powerful markup language for creating structured documents. It is particularly well suited for documents containing mathematics, but can be used for any document. Latex provides a facility for pdf output so that it is easy to share your research with other people who do not have LATEX installed. Remarkably, LATEX is freeware. It creates beautifully typeset documents, but it allows users to very quickly tackle the more complicated parts of typesetting, such as inputting mathematics, creating tables of contents, referencing and creating bibliographies, and having a consistent layout across all sections. Packages allow users to do even more with LATEX, such as add footnotes, draw schematics, create tables etc.

Report on How to Write Research Paper

Title of Session: "How to Write Research Paper"

Date: 7th November 2023 and 7th December 2023

Venue: ENTC Department

Organizing Institute: SVERI's College of Engineering, Pandharpur

Resource Person: Dr. Neeta P. Kulkarni

Participants: Final Year ENTC Students

Brief Details about the Session:

The department of Electronics and Telecommunication Engineering, SVERI's College of Engineering, Pandharpur had organised a Session on "How to Write Research Paper" on 7th November 2023 and 7th December 2023 for Final Year Students. The aim of this Session is to expose the student to produce good quality research papers. She started with the basic idea of working with Research and Innovative minds. She gave an introduction of the research and went on with explaining about each and every concept mandatory for writing a research paper. Dr Neeta included the facts related to literature survey, method sectioning and proceeded with incorporating the importance of pictorial representation in a research paper. She asked students to focus on writing abstract results and conclusions with utmost care. She explained how proper writing of references and citations are important to the quality paper. She explained each aspect of 'before', 'during' and 'after' writing the research paper. Later on, she briefed about various templates for writing research papers (IEEE conference template in detail). Finally, she motivated students for quality research and stressed on productive teamwork to have good results. Students found this workshop interesting and knowledgeable. Students got to know a lot about how to start their journey on writing their first research paper. They also got to know the idea about publishing, patenting and copyrighting.

Title of Session: "How to Write a Report in LaTeX"

Organizing Institute: SVERI's College of Engineering, Pandharpur

Resource Person: Mr. Pankaj. K. Choudhary & Ms. Mohua Biswas

Brief Details about the Session:

The department of Electronics and Telecommunication Engineering, SVERI's College of Engineering, Pandharpur had organised a Session on "How to Write a Report in LaTeX" on 4th November 2023 and 6th November 2023 for Final Year Students. The aim of this Session is to expose the student about the emerging technologies in the areas of Documentary Designing System using LATEX. The sessions will comprise theory and hands-on lab sessions. LATEX is an extremely powerful markup language for creating structured documents. It is particularly well suited for documents containing mathematics, but can be used for any document. Latex provides a facility for pdf output so that it is easy to share your research with other people who do not have LATEX installed. Remarkably, LATEX is freeware. It creates beautifully typeset documents, but it allows users to very quickly tackle the more complicated parts of typesetting, such as inputting mathematics, creating tables of contents, referencing and creating bibliographies, and having a consistent layout across all sections. Packages allow users to do even more with LATEX, such as add footnotes, draw schematics, create tables etc.

Subject: Invitation as the Resource Person for a Expert Session on "Programming Skills in Data Structure"

Respected Sir,

Shri Vithal Education and Research Institute (SVERI) is a charitable trust founded in Pandharpur (known as 'South Kashi' of India) by a group of technocrats. Today, around 4800 students are studying in this campus and around 1800 boys and 1500 girls are living in the separate hostels. The institute is moving ahead on the path of success with Excellent Academic Results, Excellent Placements, Excellent R & D, Excellent Infrastructure and Excellent Accreditations. After the establishment of the institution, various colleges have been started by this trust.

- 1. SVERI's College of Engineering (UG & PG), Pandharpur (Year:1998)**
(NAAC A+ with 3.46/4.00 CGPA and All eligible UG Programs have been accredited by NBA)
- 2. SVERI's College of Pharmacy (UG, PG & Diploma), Pandharpur (Year: 2006)**
(UG Program accredited by NBA)
- 3. SVERI's College of Pharmacy (Poly.), Pandharpur (Year: 2006)**
(Procedure for NBA is in progress)
- 4. SVERI's College of Engineering (Poly.), Pandharpur (Year: 2008)**
(All eligible programs have been accredited by NBA)

Sir, since inception, SVERI has been working for the betterment of society. The Rural Human Resource Development Facility (RHRDF) has been established at SVERI through MoU with Bhabha Atomic Research Center, Mumbai for deployment of the technologies of BARC in rural area. Around Rs. 2 Cr. CSR grant has been received from NPCIL, Tarapur for empowering villagers in Tarapur (Mumbai) region through propagation of BARC technologies. In addition, Rs. 5 Cr. grant has been approved by NITI Aayog for establishment of Atal Community Innovation Center (ACIC), in 2022. Recently, RGSTC has sanctioned research fund of Rs. 33.73 Cr. for the collaborative project of IIT Mumbai, VJTI, Mumbai and SVERI, Pandharpur on Drone Technology. The institute provides 'Earn & Learn' scheme to

the needy students for bringing them in the flow of education by sparing budget around Rs. 1 Cr. every year and making expenditure accordingly.

We are pleased to invite you to take a session on "Programming Skills in Data Structure" on **Monday, 9th & 10th Feb. 2024** for our Second year Electronics and Telecommunication Engineering Department students in the campus of the institute.

We believe that your presence and words of wisdom will take us (students, faculty members and all other stakeholders of this institute) to a different energy level which will help us achieve new heights of success in our future journey.

Sir, we are very much eager to welcome you in our campus. We are waiting for your positive response.

Thank you.

Yours truly,

Subject: Thanks Letter

Respected Sir,

This is to express our sincere gratitude towards you for guiding our students/faculty members on 10/02/2024 the topic "Programming skills in Data Structures". Your valuable thoughts will always keep our students inspiring and motivated.

This talk helped our students and faculty members for linking to their CO/curriculum Gap: G4: Practical Aspects of Construction Management, G3: Advances in Network Communication. This talk also helped to meet our "PO4: Conduct Investigations of Complex Problems, PSO3: Use the techniques, skills and modern software tools necessary for ENTC" Programme Outcomes/ Programme Specific Outcomes.

I request the same kind of cooperation in future also.

Thanking you,

Yours faithfully,

About the College: Pandharpur is well known holy place where Lord Shri Vitthal Temple is located on bank of the river Chandrabhaga. It is recognized as spiritual capital of Maharashtra and popularly known as "South kashi" of India. Shri Vitthal Education & Research Institute (SVERI), a charitable trust formed by devoted technocrats, established its first Project, the SVERI's College of Engineering, Pandharpur in 1998, which is approved by AICTE, New Delhi. It has been affiliated to PAF Solapur University, Solapur. The Engineering College is ISO 9001:2015 certified institute, was accredited by "NSA", New Delhi and NAAC A-1. About the Department: The department was established in the year 1998 and offers UG in E&TC, PG and Ph.D in E&TC Engineering. The department is backed with well qualified staff and state of art laboratory facilities. The department has established Center of Excellence in Antenna design and testing as well as Machine Learning through MOOCs. The department has nurtured the research environment through various funded projects (1.70 Cr. till date) by various funding agencies like DST, AICTE, RGSTC, BRNS, etc. The Department has got NBA and NAAC accreditation info. About the EDP: The 18-hour Entrepreneurship Development Program (EDP) on "Entrepreneurship Awareness Camp" organized to provide students with	Knowledge of business and to make them successful businessmen. To create the awareness among the students about entrepreneurship and to make them job provider instead of job seeker. The EDP aims to help in the rapid growth of the economy by supplying skilled entrepreneurs. This program primarily aims at providing self-employment to the young generation. स्वेरीत उद्योजकता मार्गदर्शन शिबीर संपन्न

पंढरपूर - गोपाळपूर (ता.पंढरपूर) येथील स्वेरीज कॉलेज ऑफ इंजिनिअरिंगमधील तृतीय वर्षाच्या विद्यार्थ्यांसाठी उद्योजकता मार्गदर्शन शिबीर नुकतेच संपन्न झाले. तीन दिवस चाललेल्या या शिबिरात मान्यवरांनी उद्योजकतेबाबत बहुमोल मार्गदर्शन करून 'नोकरीच्या मागे न लागता उद्योग-धंद्यात करिअर करा' असा संदेश दिला.

ग्रामीण विद्यार्थ्यांच्या सर्वांगीण विकासासाठी कटिबद्ध असलेल्या स्वेरी मध्ये विविध उपक्रम राबवले जातात. अशाच उपक्रमांचा एक भाग म्हणून हे शिबीर आयोजित करण्यात आले होते. या मार्गदर्शन शिबिराच्या पहिल्या दिवशी प्रथम सत्रात मार्गदर्शक रामचंद्र वाघमारे यांनी भारतामध्ये प्रचलित असलेल्या उद्योजकतेबद्दल माहिती दिली आणि आज उद्योग स्थापनेसाठी आणि तो टिकवण्यासाठी काय करावे लागते याबाबत सविस्तर माहिती दिली. दुसऱ्या सत्रात एमसीइडी सोलापूर येथील प्रकल्प अधिकारी राजशेखर शिंदे यांनी 'उद्योजकता व जिल्हा उद्योग केंद्राची इंजिनिअरिंगच्या विद्यार्थ्यांबाबतीत असलेली भूमिका स्पष्ट केली तसेच राज्य सरकार आणि केंद्र सरकार यांच्याकडून मिळणाऱ्या सबसिडी बाबत सविस्तर माहिती सांगितली.

दुसऱ्या दिवशी सकाळच्या सत्रात पुणे येथील जिल्हा उद्योग केंद्राचे प्रकल्प अधिकारी सूर्यकांत माढे यांनी उद्योगासाठी लागणाऱ्या आर्थिक बाबींवर चर्चा केली. यामध्ये प्रकल्प अहवाल बनविणे, प्रकल्प मंजूर करणे याबाबत आवश्यक माहिती देवून त्याचे प्रात्यक्षिक करून दाखविले. दुपारच्या सत्रात कोल्हापूर येथील उद्योजक संजय पाटील यांनी बाजारपेठ व्यवस्थापन (मार्केटींग

मॅनेजमेंट) याबाबत माहिती दिली.

तिसऱ्या व अखेरच्या दिवशी सोलापूर येथील उद्योजक अरविंद जोशी यांनी उद्योग जगतात यशस्वी होण्यासाठी उपलब्ध असलेल्या संधीबाबत मार्गदर्शन केले तसेच बिना भांडवल अथवा कमी भांडवलामध्ये उद्योग कसा सुरू करावा? यावर अभ्यासपूर्ण माहिती दिली.

दुसऱ्या सत्रात पंढरपूर मधील कर सल्लागार अक्षय शहा यांनी उत्पादन शुल्काबाबत माहिती दिली. तसेच उद्योग करत असताना शासनाकडून उद्योगास मिळत असलेल्या कर सवलतीबाबत मार्गदर्शन केले. अभियांत्रिकी पदवी प्राप्त केल्यानंतर विद्यार्थ्यांना नोकरीच्या मागे न लागता उद्योगात भरारी घेण्यासाठी हे शिबीर फायदेशीर ठरणार आहे, हे मात्र नक्की. या तीन दिवसीय शिबिराला विद्यार्थ्यांनी प्रचंड प्रतिसाद दिला. उद्योग धंदे उभारणीबाबत अनेकांनी प्रश्न विचारले असता प्रकल्प अधिकार्यांनी समाधानकारक उत्तरे दिली.

यावेळी सारथी फॉउंडेशन सोलापूरचे प्रकल्प अधिकारी रामचंद्र वाघमारे, सौ.अमृता पालवे, चर्कशॉप इन्वार्ज प्रा. बी.डी. गायकवाड, समन्वयक प्रा.शशिकांत कांबळे, प्रा.शांतीसागर ताकपेरे, प्रा.मनोज देशमुख आदी उपस्थित होते.

कार्यक्रम यशस्वी होण्यासाठी स्वेरीचे संस्थापक सचिव डॉ.बी.पी.रोंगे यांच्या मार्गदर्शनाखाली स्वेरी कॅम्पस इन्वार्ज डॉ.एम.एम.पवार यांच्या सहकार्याने इलेक्ट्रॉनिक्स अँड टेलिकम्युनिकेशन इंजिनिअरिंगच्या विभागप्रमुख डॉ. मिनाक्षी पवार यांच्या नेतृत्वाखाली प्राध्यापक वर्ग, शिक्षकेतर कर्मचारी व विद्यार्थी यांनी परिश्रम घेतले.
